

BIRDS TRANSPORT

GIORDANO
POULTRY PLAST®

GIORDANO POULTRY PLAST

Giordano Poultry Plast® was founded in 1962 and continues to be run by the Giordano family.

Since its origin, it has devoted itself to the poultry sector, specialising in it: from hatching to breeding, all the way down to slaughtering and transport, and it has made its production revolve around a material endowed with countless qualities: plastic.

Equipment supply to animal farming represents the deepest root of the group activity, and the sector in which its longest history has given birth to a wide-ranging and well-structured production and commercial organization worldwide.

The specific expertise in the use of materials has led to the development, especially in recent years, of a significant network of relationships with other leading companies in the sector, operating not only in the breeding field but also in such other fields as slaughtering and transport, for which the Giordano group designs and creates high-tech plastic products and components. A supplementary recognition of skill and reliability.

Thanks to a direct knowledge of the usage profile and of the different technical and practical needs coming from the various sectors within the global poultry industry, the Company attends directly to all production phases. From creation to design, in our R&D department, and final manufacture, the company is always looking for innovative high-performing products and solutions, capable of combining efficiency, cost-effectiveness and durability.

BIRD TRANSPORT

The transport of live birds is a fundamental process in poultry production.

With over half a century of experience in the industry, Giordano Poultry Plast® provides what is currently the biggest worldwide range of transportation crates for use in the professional poultry sector.

Recognized for excellent quality and precise design, these easy-to-use poultry crates are among Giordano's best known products.

Giordano Poultry Plast® products are suitable for several poultry sector species. The term "birds" refers to poultry production animals in general includes: laying hens, broilers, day-old chicks, turkeys, quail, bird game.

All the cages and boxes of Poultry Plast are strong and durable, hygienic and easy to clean. Animal welfare is guaranteed thanks to excellent ventilation, easy stacking, as well as smooth and round surfaces that minimize bruises and broken wings, preventing injuries during coop handling.

The products in the range are made with HD polyethylene and UV stabilized that reduces ageing due to solar rays. The coop line is very simple to assemble: push fitself locking. No equipment is needed, as a simple pressure ensures the complete assembly of the coop.

BOX 4 COMPARTMENTS

Cod. 0402001

CHARACTERISTICS

Outside dimensions:
690x490x160 mm

Weight:
1,940 kg

Load resistance:
200 kg

Capacity:
25 chicks x 4

Shipping capacity:
1.050 pieces per 20' cnt
2.100 pieces per 40' cnt
2.500 pieces per 40' HC

Cod. 0403001
COVER

BOTTOM

BOX 2 COMPARTMENTS

Cod. 0402002

CHARACTERISTICS

Outside dimensions:
690x485x180 mm
Weight:
2,200 kg
Load resistance:
200 kg
Capacity:
50 chicks x 2
Shipping capacity:
2.200 pieces per 20' cnt
4.510 pieces per 40' cnt
5.000 pieces per 40' HC

Cod. 0403003
COVER

BOX 1 COMPARTMENTS

Cod. 0402003

CHARACTERISTICS

Outside dimensions:
630x420x155 mm
Weight:
1,650 kg
Load resistance:
200 kg
Capacity:
100 chicks
Shipping capacity:
1.020 pieces per 20' cnt
2.000 pieces per 40' cnt
2.490 pieces per 40' HC

CONTAINER & PALLET

There is a wide range of Giordano Poultry Plast® containers and pallets intended for a variety of product handling uses and sectors. The plastic materials lend them special versatility and resistance.

Few things that make the Giordano container line cost effective and safe: the special design enables maximum ventilation, quicker and easier cleaning, while perfect interlocking reduces the danger of load shifting. All containers are also fully nestable and stockable.

High density polyethylene construction guarantees maximum resistance to high and low temperatures. All containers are suitable for deepfreeze.

Consisting in a single mono-block and resistant to both low and high temperatures (from -20 to +40 °C), Giordano Poultry Plast pallets are the most robust, hygienic and ecological alternative to the conventional pallet, easy to clean and dry.

Equipped with anti-overturning crossbeams, the Pallets are manufactured with materials suitable for contact with foodstuffs (HDPE), impact-resistant raw materials, and are 100% recyclable and disinfectable.

Special colours are available upon request and customisation is possible with name and RFID numbering.

The metal supports make the pallets suitable for rack. The UV stabilizer reduces ageing due to solar rays.

NB: The calculation of the capacity corresponds to the number of WHOLE chickens slaughtered. The rotisserie chickens are 1 kg each, adult chickens are 2,5 kg each.

T 78

Cod. 0405001

CHARACTERISTICS

Outside dimensions:
770x435x250 mm
Weight:
2,020 kg
Capacity:
60 l
12 rotisserie chickens or
6 adult chickens
Shipping capacity:
850 pieces per 20' cnt

F 68

Cod. 0404001

CHARACTERISTICS

Outside dimensions:
