

# Oestergaard delivers the world's largest disc dryer (measured on heating surface)

*Oestergaard has manufactured and delivered the world's largest Disc Dryer up to this date (measured by heating surface) to a valued customer.*

*The Disc Dryer weighs more than 165 tons and has a heating surface exceeding 900 squaremeters.*

# Oestergaard moves into drying systems for the food industry

*In July 2023 Oestergaard took over technology from Siccadania Freeze Drying A/S who was specialized in designing and delivering energy-efficient freeze-drying technology, engineered to fit the customers' applications.*

*Oestergaard will develop this area with a team of dedicated employees, including former employees of Siccadania that are now being integrated as part of the Oestergaard family.*

*We look forward to welcoming our new colleagues, developing this area of expertise and carry on Siccadania's elaborate work by continuing to serve their former freeze-drying customers with the utmost care and respect.*
